Serena Adaptive Cruiser

Serena Adaptive Cruiser

Complete SUP Packages

The Serena Adaptive Cruiser is the perfect board for exercise and to challenge your skills enjoying and experiencing Stand Up Paddling in any water environment. The Serena Adaptive Cruiser provides Serena's widest and thickest platform, perfect for additional weight and for some added stability. This board has exceptional stability with great tracking and maneuvering on the water. Its full traction deck pad provides a slip free surface while giving the maximum comfort for your accessories and needs while on the board. Now you can take your adventure anytime and anywhere on the water.

Serena Adaptive Cruiser Hard Top Boards are made of hand finished EPS foam core and wooden stringer for added strength, with 3 layers of 6 oz. fiberglass from nose to tail and an extra 6 oz. layer of fiberglass added to the mid-section of the board. The bottom of the board is finished with 2 layers of 6 oz. fiberglass. We have added two attachable pontoons that are constructed in the same fashion as the main center board for added structure and stability.

Serena Paddle Sports had the realization that we can build a Stand Up Paddle Board following the vision, support tools and systems that individuals face every day and still want to enjoy watersports. With the Serena Adaptive Cruiser, we are providing a product to attack challenges head on, break through them, and create a life rich in fulfillment, purpose and impact.
